

## Systems Integration Challenge: The customer wants video panels and walls!

**The Opportunity:** Providing a multiplicity of video formats in commercial and business establishments can prove daunting. With the right optical extension and channel handling equipment, video quality is guaranteed glitch-free and secure over long distances. Configuration is left to the imagination with Vitex Spider distributor and matrix router gear.

Dual-LCD panels provide HD format for streaming data from several sources in a medical center.

Video walls provide a multiplicity of display options.

**The Solution:** The Vitex DVFX-110 is the latest optical extension module that permits the transmission of distortion-free and secure HD imaging - over one glass optical fiber. The Spider interconnectivity products provide efficient DVI/HDMI signal splitting and routing as specified need.

DVFX-110 DVI Single-Fiber Extension Modules

HDMI 1:5 Distributor

HDMI 8:8 Matrix Router

**The Result:** A truly breath-taking visual experience!
